

# Product Overview

**ABZAR TAMIN ARSHIA Co.**

**Process Measurement & Control Instruments  
Supplier**

**Engineering Insight, Precision Supply**

## EMPOWERING INDUSTRIES THROUGH ENGINEERING EXCELLENCE

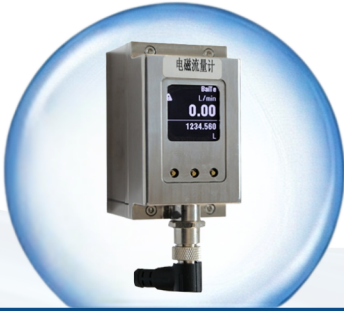

### **Abzar Tamin Arshia**

is more than just a supplier;  
we are your strategic engineering partner  
in the field of instrumentation.

Backed by over 30 years of technical experience. our team is founded on the belief that procuring industrial equipment requires deep technical insight, not just a catalog number. We distinguish ourselves by offering comprehensive consulting services, ensuring that every solution we provide—whether for Pressure, Temperature, Flow, or Level measurement—is technically optimized for your specific process requirements.

We bridge the gap between rigid, high-cost official representation and the uncertainty of general market trading. Our hybrid procurement model allows us to supply both top-tier European brands and high-quality, verified Asian alternatives, tailored to the realities of the local market. Whether serving the Food , Pharmaceutical, or Steel industries, Abzar Tamin Arshia is committed to delivering the perfect balance of performance, reliability, and cost-efficiency, helping you solve complex challenges with confidence.

Flow meters measure the flow rate of liquids or gases to ensure accurate and reliable process control. They are widely used across oil and gas, petrochemical, water treatment, power generation, and various manufacturing industries.

F1-Electromagnetic Flow Meter  
(Low flow)

F2-Electromagnetic Flow Meter (In-line)

F3-Electromagnetic Flow Meter (Insertion)

F4-Turbine Flow Meter  
(Liquids)

F5-Turbine Flow Meter  
(Gases)

F6-Clamp-on Ultrasonic Flow Meter

F7-In-line Ultrasonic Flow Meter

F8-Vortex Flow Meter

F9-Low Flow Thermal Flow Meters

F10-Thermal Mass Flow Controller - MFC

F11-In-line Thermal Mass Flow Meter

F12-Insertion Thermal Mass Flow Meter

F13-Gear Flow Meter

F14-Coriolis Flow Meter

F15-Flow Switch

Pressure measurement instruments provide accurate monitoring of system pressure to maintain safety and stable operation. These devices—such as pressure gauges, transmitters, and differential pressure meters—are used across oil and gas, petrochemical plants, water systems, power generation, and industrial manufacturing.

P1-Pressure Gauge

P2-Differential Pressure Gauge

P3-Digital Pressure Gauge

P4-Compact Pressure Transmitter

P5-Smart Pressure Transmitter

P6-Compat Differential Pressure Transmitter

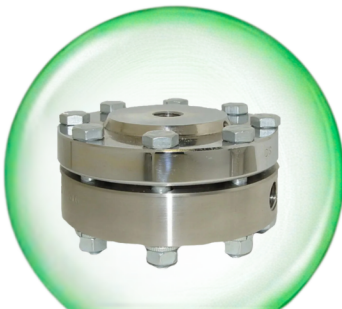

P7-Smart Differential Pressure Transmitter

P8-Mechanical Pressure Switch

P9-Electronic Pressure Switch

P10-Diaphragm Seal

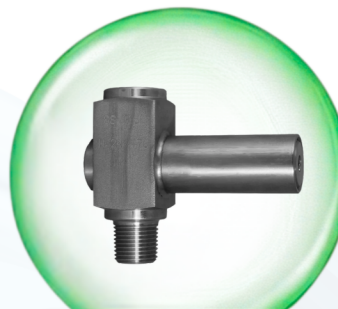

P11-Manifold

P12-Syphon

P13-Cooling Tower

P14-Gauge Protector (Overpressure Protector)

P15-Pressure Snubber

Temperature measurement devices provide accurate monitoring of process temperature for safe and efficient operation. Instruments such as thermocouples, RTDs, and temperature transmitters are used in oil and gas, petrochemical plants, water systems, power generation, and general industrial applications.

T1-Bimetal Temperature Gauge

T2-Filled Temperature Gauge

T3-RTD - Resistance Temperature Detector

T4-Thermocouple Temperature Sensor

T5-Head Mount Temperature Transmitter

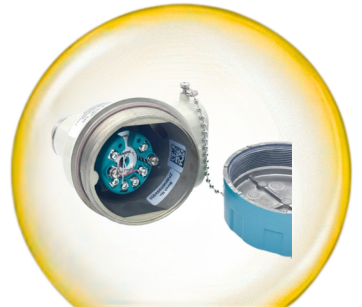

T6-Rail Mount Temperature Transmitter

T7-Field Mount Temperature Transmitter

T8-Integrated TC Temperature Sensor & Transmitter

T9-Integrated RTD Temperature Sensor & Transmitter

T10-Thermowell

T11-Mechanical Temperature Switch

T12-Electronic Temperature Switch

Level measurement devices monitor the height of liquids or solids in tanks and process vessels to ensure safe and reliable operation. They are used in industries such as oil and gas, petrochemical, water and wastewater, food processing, and power generation.

Level Measurement Solutions

L1-Ultrasonic Level Transmitter

L2-Non-Contact Radar Level Transmitter

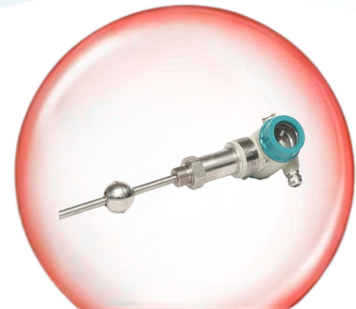

L3-Guided Wave Radar

L4-Submersible Level Transmitter

L5-Hydrostatic Level Transmitter

L6-Magnetostrictive Level Transmitter

L7-Level Switch
